

# THE BLIND STAPLER™

**\*The Blind Stapler™ makes all other methods of attaching a face frame obsolete!**

**\*The Blind Stapler™ will save you tens of thousands of dollars in labor alone!**

**\*Its revolutionary design eliminates the need for pocket screws, biscuits or nails!**

**\*This new, fail safe tool will forever change the way a cabinet is built!**

## **What It Does:**

*Light and easy to use, The Blind Stapler™*

**\*Attach a face frame to a cabinet box in seconds. No more pocket screws, nails, or putty!**

**\*Will attach a drop edge to a shelf with no visible marks that require filling and sanding!**

**\*Will align the finished edge of a face frame with the finished edge of a cabinet!**

**\*Will attach a finished wood edge to counter tops with no marring!**

**\*Use for cabinet re-facing to attach new face frames without leaving a mark!**

**\*Will eliminate the need for putty to any surface!**

**\**FAST* pre-finish your cabinet before assembly!**

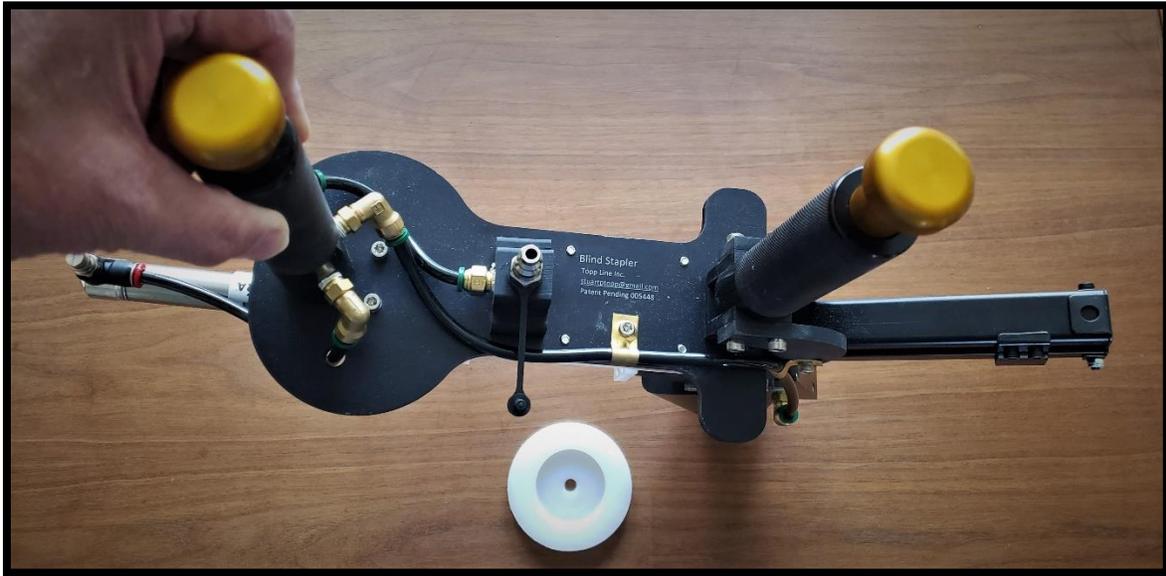

## **How It Works:**

Just load a rack of 1" x 1/4" crown staples into the carriage. Attach a 1/4" air-line onto the quick release nipple. Press the first plunger to align and clamp the face frame to the cabinet box. Press the second plunger and the staple automatically is driven underneath at an angle, securing the frame to the box. *FAST, EASY, EFFICIENT!!*

Even the most demanding production cabinet jobs will assemble quickly and efficiently. The Blind Stapler™ will be one of the easiest and most used tools in your cabinet shop.

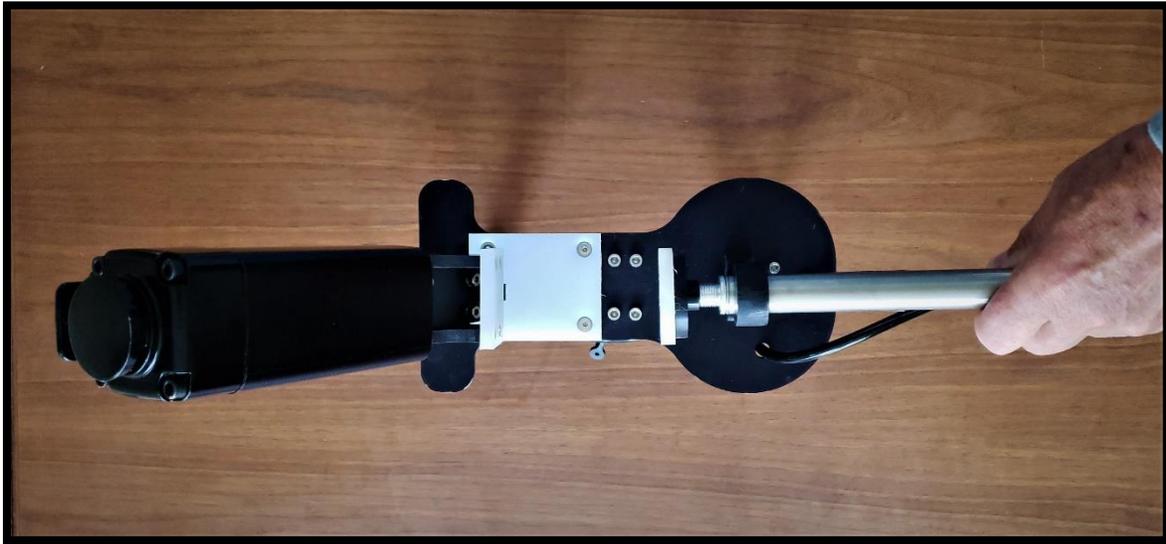

The Blind Stapler™ is an "all in one" tool. No more drilling, pocket screws, biscuits or putty. Besides 1" staples, *NOTHING ELSE IS NEEDED.*

Forget driver drill slippage and cabinet marring. The BLIND STAPLER™ will never leave a mark. In fact, you can even pre-finish your cabinet if you want. No more broken screw driver tips, pricked fingers or time spent filling and patching. The BLIND STAPLER™ eliminates it all!

## **Construction:**

- \*No expense was spared in the making of this tool!
- \*The metal parts of the tool are constructed from 6061 aircraft aluminum.
- \*They are machined from solid blocks, or solid sheets of the aluminum.
- \*They are machined on CNC milling machines. The flat metal parts are cut on a water jet CNC machine.
- \*All screws used to assemble the parts are stainless steel.
- \*All of the plastic parts are made from UHMW non- marring composite.
- \*The parts are anodized at Global metal finishes in Roanoke VA.
- \*All the parts are then assembled by me at my shop in Randolph VA, and tested for absolute accuracy, and pressure before going out for sale.
- \*Even the O-Rings are the best oil impregnated ones on the market!

## **Benefits & Costs:**

\*The cabinet shops that have purchased the stapler tell me that the saving in labor alone are between 22,000.00 and 24,000.00 per year!

\*It takes 5 standard cabinet jobs to pay for the stapler investment, in labor savings alone!

\*Also, pocket screws cost approx. 145.00 per case, where as 1 inch staples will cost you 20.00 for 5000 staples!

\*Any 1 inch, 18 gauge, 1/4 crown staple will work in the blind stapler!

\*Your initial cost of \$2750 (plus applicable State tax) will pay for itself many times over in the first year alone and you will be amazed at its superior performance!

\*\*\*\*\*

"As a cabinet builder for the last 45 years, I know that one of the most time consuming and tedious parts of cabinet construction is attaching a face frame to the cabinet box.

"Newly retired, I spent most of my time in my cabinet shop doing what I liked best... woodworking!

Now I had the time to design and create what will prove to be a game changer for cabinet shops around the world!

## **Conclusion:**

**“Whether or not you decide to add The BLIND STAPLER™ to your business, I thank you in advance for taking the time to let me share it with you!**

**I stand behind The BLIND STAPLER™ with a 100% money back guarantee and will be more than happy to answer any questions that you may have!**

**Try this unique tool in your business and you’ll never go back to the old method!”**
